2	Bonus Points <sup>4</sup>

Note: 1.The information being provided in the rating table is part of a teacher evaluation system and has not yet been validated. ADE recommends that LEAs do not wholly rely on the information provided in these tables when designating summative teacher classifications as part of the evaluation process, without piloting the rating system first.

2. The weighting on school/classroom-level data is greater for SPED teachers without student survey as part of their evaluation.

3. Data are aggregated for each teacher. If a teacher has multiple classrooms or grades, data from those classrooms are combined for the aggregation.

4. In order to encourage more inclusive and collaborative practices within general education settings, special education and general education teachers who collaborate to close the achievement gap between the students with IEPs and general education students will receive 2 bonus points in the final calculation.
